

One Equity Concept

Introduction

At One Equity we strive to be more than just a staking pool.

We consist of a core of people, who have the capabilities to rethink the standards of what a staking pool can be. At first glance, staking can seem like a relatively passive experience, merely just providing interests.

At One Equity we provide you with the chance to engage with your staking-peers and uplift each other and the world around you. We value a solid community and want to give back to the world through our delegators.

As a delegator at One Equity, you will contribute to our decentralized charity project.

This project is built on contributions, engagement and seniority by our delegators. We have developed a system that seeks to reward loyal delegators on a long term basis, beyond your passive earnings. In turn, we hope that our delegators will be ambassadors for the charity project, and we trust you to spend your rewards in a charitable way.

Through the concept of decentralized charity, we expand the boundaries for what a staking pool can be.

Rewards and Charity

It's a common basis to gain rewards through staking, and some pools offer opportunities to win additional rewards through giveaways or other types of reward-based systems. Additionally, it is somewhat of a general idea for pools to utilize the pool's reward-funds to contribute to certain charities. These charities are typically chosen by the pool operators, and the delegators help to enforce the pool's ability to bestow on charity.

At One Equity, we want to approach this topic differently. We comply with the concepts of both reward systems and charity donations through staking, but want to create a more distribution-based system. Instead of our delegators passively contributing to charity, we want to bring the opportunity to the delegators in our community.

We believe in the goodness of mankind and hope that our delegators can use their pool rewards to support causes of their own liking. Instead of wasting pool funds on one or few common charities, this concept will aim to alleviate more ADA to our improved randomized reward system. This means more funds to reward our delegators. In turn, we hope that these rewards incentivize the recipients to do a little good for someone, or something, that they find charitable, thus encouraging a sort of decentralized charity system.

Reward Systems

In total, **100 ADA** will be allocated to 2 different types of reward systems, each time we mint a block in an epoch.

- **70 ADA** are distributed between the different **sub-pool raffles**.
- **30 ADA** will be allocated into a **charity-reserve**, which will accumulate for a period of 15 epochs.

Sub-pool Raffles

Our reward system is based on a raffle, in which delegators have a chance to acquire additional ADA rewards, rooted in the amount of ADA staked by the individual. In total, 70 ADA will be at stake, and this raffle is held every time our pool mints a block, and will be automated.

You will sign up as a participant of the raffle, through a microtransaction on our website (LINK).

The raffle is divided into 5 interval based sub-pools, in which each sub-pool have different levels of ADA rewards related to them. The intervals of the 5 different sub-pools can be seen in Figure X, as well as the associated reward.

Raffle Level	Stone	Bronze	Silver	Gold	Diamond
Amount Staked	100 - 499	500-2499	2500 - 10000	10000 - 24999	25000 - 74999
ADA Reward	5 ₳	7 ₳	10 ₳	18 ₳	30 ₳

The amount of ADA staked, determines which sub-pool you are a part of. In order to win the raffle, the delegators are given tickets based on the total amount of ADA staked. Specifically, delegators gain 1 ticket per commenced 1.000 ADA staked in the pool, as seen in Figure X. There is a minimum requirement of 100 ADA staked to One Equity to partake in the raffle.

ADA Stake Amount	Raffle Tickets
< 1.000	1
1.000 - 1.999	2
2.000 - 2.999	3
3.000 - 3.999	4
4.000 - 4.999	5
5.000 - 5.999	6
...	
10.000 - 10.999	11

20.000 - 20.999	21
50.000 - 50.999	51

The distribution of delegators in different sub-pools, as well as each delegator's ticket amounts, will be transparent through our website.

In order to either increase your chance of winning the raffle in your sub-pool, or climb the ladder to enter a more prosperous sub-pool, delegators must increase their ADA staking amount.

The higher sub-pools will have higher rewards, as well as (typically) fewer delegators, thus overall increasing the chances of winning the raffle. In that way, we seek to accommodate big contributors to our pool.

Charity-reserve

As mentioned in **reward systems**, this is where the remaining 30 ADA will accumulate every 15th epoch.

Every 15th epoch, we will engage in a live raffle held on Discord. Only active participants will have a chance of winning this charity-reserve. We have chosen to split the reserve into two, and hold two separate raffles:

- Half of the reserve will be awarded to a participant within the lower sub-pools, Stone - Silver (100 - 9.999 ADA)
- The other half for the higher sub-pools, Gold - Diamond (10.000 - 74.999 ADA).

In order to win the charity-reserve, you will also need tickets. However, these tickets are earned through seniority within the pool, ie. how long one has been an active delegator to the pool. It is possible to improve your seniority level after each 15th epoch. The different levels, and their associated tickets, are shown in Figure X.

Rank / NFT	Tickets for Charity-Reserve	Time Frame
Common Clam	1	2 - 15 Epochs
Koi Fish	2	15 - 30 Epochs
Longfin Eel	3	30 - 45 Epochs
Ever-growing Lobster	4	45 - 60 Epochs
Hardshell Turtle	5	60 - 75 Epochs
Radiation-resistant Bacterium	6	75 - 90 Epochs
Immortal Jellyfish	7	90 - 105 Epochs

Thus, delegators who have been staking for longer, will have increased chances of winning the charity-reserve, regardless of how much ADA each delegator has.

Initially, delegators will have their seniority ranks upgraded automatically and we will keep track of the longevity of each delegator's memberships.

This charity-reserve is our way of contributing to charity initiatives. However, we believe these funds are in better hands within our trustworthy delegators, than those of arbitrary charity organizations. In return, we hope to encourage the lucky winners to give a little back to the world.

***However, these reward systems may be subject to change over time, in order to accomodate long-term sustainability of the pool.*
